Client: XYZ Health Systems
Report Type: Cybersecurity Risk Assessment
Date: 2025-10-05
Threats:
- High risk of ransomware attacks due to exposed RDP services.
- Brute-force login attempts from foreign IP addresses.
Vulnerabilities:
- Weak password policies.
- Exposed RDP ports without IP restrictions.
Security Incidents:
- Repeated authentication failures on critical servers.
- One successful unauthorized login detected.
Recommendations:
- Disable public RDP access.
- Enforce strong password and lockout policies.
- Implement centralized SIEM monitoring.
